O-PITBLAST

O-PITDEV

O-PitDev is definitive solution for measuring borehole deviations in quarries and mines. Designed by scientists and researchers who understand the needs of the workers on the ground. O-Pit-dev has cutting-edge technology, leading to a faster and more precise measurement readings. Efficient for 360° measurements, operates in metal and non-metal mines and it is waterproof and shock resistant.

Key features:

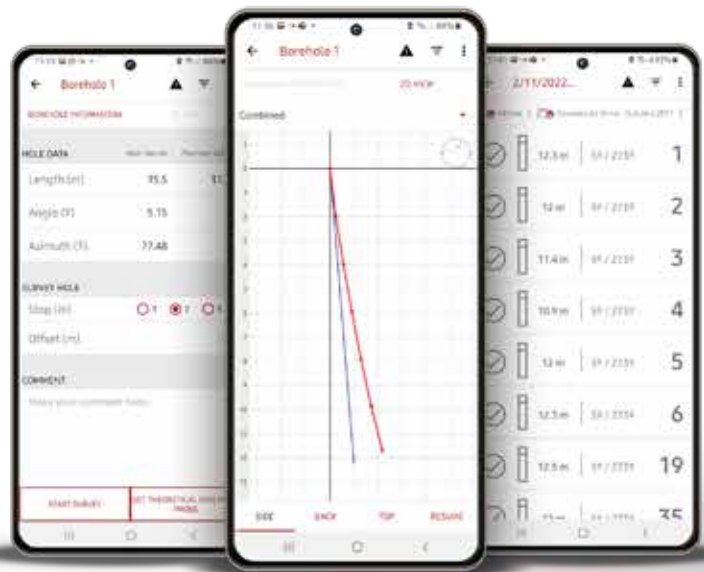

Quick release rope system.

Led status indicator for easy and fast operation.

Structure made of AISI 304 stainless steel.

Ergonomic nose that makes it easy to operate even in the most complex boreholes.

🌡️ Temperatures range from -40°C to 70°C and 90% of the materials used are recyclable. ♻️

A direct connection to the O-PitDev App transmits data over the O-PitCloud, providing immediate borehole information to the engineer responsible for the project.

The O-PitDev comes equipped with Bluetooth 4.2. BLE connectivity that enables communication with any smartphone equipped with Bluetooth and Android 8.0. or above. 📶

O-PitDev includes:

- Probe
- Hardcase
- Battery charger
- Extra USB
- O-Rings
- Armband
- 3 Touch pens
- Rope
- Carabiners
- Clean towel
- Grease
- User manual

In the event of an incident, your O-PitDev is covered by a warranty
